Montreal, Canada | +1(437) 556-7303 | [adeoluwatinuoye@gmail.com](mailto:adeoluwatinuoye@gmail.com)

## PROFILE

QA Lead with 10+ years of experience in SaaS, healthcare, and blockchain fintech. Expertise in building automated frameworks with Playwright and Cypress and leading agile QA teams. Skilled in creating test strategies for high-frequency, user-centric web3 applications with robust CI pipeline integration. Proven ability to optimize QA operations for secure, reliable crypto trading platforms.

## CORE COMPETENCIES

- **Testing Types:** Manual Testing, UI/UX Testing, Regression, Cross-Browser Testing, Exploratory, Smoke, Accessibility (WCAG), API Testing, Integration Testing, UAT
- **Tools & Frameworks:** Playwright, Cypress, Pytest, Postman, Swagger, Charles Proxy, TestRail, Jira, Zephyr, Chrome DevTools
- **Languages:** JavaScript, TypeScript, SQL, Dart, Python
- **CI/CD & Collaboration:** Git, GitHub, GitLab, CircleCI, Jenkins, Docker (for test env), Slack, Confluence
- **Browsers:** Chrome, Safari, Firefox, Edge (Windows & Mac)

## PROFESSIONAL EXPERIENCE

### Circle Medical Technologies

**Jun 2024 - Present**

*Senior Mobile QA*

*Montreal, Canada*

- Led the QA strategy for critical web and mobile healthcare features, ensuring robust quality standards for 4000+ daily users under high data traffic conditions.
- Analyzed business requirements and acceptance criteria to develop prioritized test plans with comprehensive risk assessments, integrating cross-browser testing for consistent user experience.
- Developed and executed automated regression suites using Playwright and Postman, incorporating manual testing insights and API testing to enhance overall reliability.
- Implemented automated smoke tests across a diverse grid of browsers, operating systems, and devices, achieving a 70% reduction in escaped defects and reinforcing responsive design validations.
- Reported detailed QA metrics to leadership and coordinated defect triage sessions with product management and DevOps, strengthening test organization and QA operational efficiency.

### KLIM GmbH

**Feb 2023 - Aug 2024**

*Senior QA Engineer*

*Remote*

- Championed the frontend test strategy for a carbon-tracking web application, ensuring robust manual and automated testing—including cross-browser validations across Chrome, Firefox, Safari, and Edge—for over 50k users.
- Conducted extensive UI/UX validations and integration testing on multiple screen sizes, reinforcing consistency in responsive designs and high-frequency data updates.
- Designed and maintained comprehensive test plans and cases within Agile sprints to align with development cycles, emphasizing end-to-end testing and trade execution validations.
- Oversaw regression, smoke, and automated testing across staging, development, and production environments, effectively integrating testing tools and CI pipeline optimizations.
- Tested GraphQL and REST APIs with Postman and Swagger to verify data integrity and system functionality, aligning with rigorous QA engineering standards.
- Collaborated with developers to define acceptance criteria while promoting continuous improvement in QA function, ensuring thorough test coverage and proactive identification of potential challenges.

### Lottie(Totoli) - Media & Education App

**Aug 2022 - Jan 2023**

*QA Engineer*

*Remote, Germany*

- Conducted detailed UI/UX testing across multiple e-commerce platforms and internal tools.
- Designed and executed manual test cases for checkout, payment integrations, and catalog modules.
- Worked closely with developers to clarify requirements and ensure quality pre-release.
- Managed test environments, participated in release validation, and provided end-of-sprint QA reports.

### Nuri GmbH

**Oct 2020 - Dec 2022**

*QA Engineer (Blockchain - Fintech)*

*remote, Germany*

- Delivered mobile and web testing across crypto trading apps.
- Focused on secure auth and mobile rendering stability using Appium with webdriver.io & leveraging xcuitest and uiautomator for iOS and android.

### Beta Fashion GmbH

**May 2020 - Dec 2020**

*QA Consultant*

*Remote, Germany*

- Built end-to-end QA framework using Cypress and Docker for frontend features.
- Delivered REST API test suites using Postman and integrated with CI pipelines.
- Led exploratory test sessions and reported key usability and edge case insights.

**Sofha GmbH****Sep 2019 - May 2020***QA Engineer**Berlin, Germany*

- Performed print and software tests across Windows and MacOS platforms.
- Created manual test plans aligned with software spec requirements.
- Logged defects in Jira with replication steps and environment details.
- Configured virtual machines and simulators to emulate real-world print scenarios.

**DBT****Jan 2015 - Aug 2019***QA Engineer**Lagos, Nigeria*

- Led QA process transformation from manual to automated, building core libraries and mentoring junior QAs.
- Designed full-cycle test coverage from requirements to release for web and backend solutions.

**EDUCATION****Ecole Superieure de Gestion et de Technologie****Sep 2022***Msc, Information Technology***University of Law Business School****Sep 2020***Masters Degree, Strategic Business Management***University of Abuja****Nov 2014***Bachelors Degree, Economics***CERTIFICATES**

- AWS Certified Solutions Architect
- Project Management Professional (PMP)
